Figure 5: Setting part(Tao Li)

Deployment

In order to deploy our Android Application you will need the Android Studio IDE which can be found at :

https://developer.android.com/studio/index.html

Once you have the ide installed you will need either clone the repository

from our GitHub repository (https://github.com/tali0273/csci3308-project) , or simply download the Social Buff folder from our repository and open the project using this folder. It should simply load the project using the Android project build.gradle file.

Auto-Doc

We used javadoc for our auto-documenter, the documents can be found in the Database Documentation folder of our github repo:

- ○ https://github.com/tali0273/csci3308-project/tree/master/Database%20Documentation

GitHub Activity

Feb 12, 2017 – May 4, 2017
